HANBAEK PRECISION CORPORATION

K-Semiconductor Materials and Components Company!

HANBAEK PRECISION CORPORATION

HANBAEK PRECISION CORPORATION innovation thrives through our commitment to the belief that 'the difference in fineness is innovation.' As a leading force in the semiconductor industry, we specialize in precision processing technology for core semiconductor parts. Our top-notch precision parts, including semiconductor wafer vacuum chucks, semiconductor porous chucks, and semiconductor flow meters, are known for their quality and durability. With our in-house R&D Center, we enhance product quality and develop cutting-edge technologies. Moreover, we actively participate in corporate and national research support projects, aimed at localizing parts. This collaborative effort underscores our commitment to innovation and continuous improvement in the semiconductor industry.

Through collaborative partnerships with global materials, parts, and equipment companies, we optimize processes for cost-effective solutions. Our strategically integrated manufacturing infrastructure ensures prompt delivery to valued customers. We have a strong presence in both Korea and the United States, which are the world's largest semiconductor markets. This enables us to proudly serve leading global companies. Our top priority is customer satisfaction, and we are committed to continuous innovation to meet a wide range of semiconductor needs.

HANBAEK PRECISION CORPORATION, we embrace challenges, providing the best precision processing technology and top-tier products. Through continuous development of core technology capabilities for precision parts, we aim to create new business opportunities that contribute to our customers' successes. Thank you for supporting us as we shape a brighter future in the semiconductor industry.

Experienced Skill

Reliable Company HANBAEK

Trustworthy HANBAEK for Our Clients

HANBAEK PRECISION CORPORATION, trusted by customers, is a specialized company in K-semiconductor materials and components, with an unwavering commitment to customer satisfaction. We excel in ODM/OEM manufacturing of precision parts for semiconductor equipment, including semiconductor wafer vacuum chucks, porous chucks, flow meters, and level sensors. Additionally, we offer modular component assembly solutions and specialize in precision parts for semiconductor equipment, working with exceptional materials like Oxygen-Free High Conductivity Copper (OFHC).

[BUSINESS AREA]

Precision Part Manufacturing

Special Materials, Precision Machining, Short Lead Time, Securing Swift Service and Emergency Response Capability

Semiconductor Wafer Vacuum Chuck
Semiconductor Porous Chuck
Semiconductor Flow Meter
Semiconductor Level Sensor
Semiconductor Equipment Parts
Precision JIG Production

Module Component Assembly

Customized Modular Component Assembly to Meet Customer's Requirements

Semiconductor Core Component
Semiconductor Flow Meter

R&D Center

Research and Development of New Products, Special Materials, Precision Machining Technology Research

Domestication of Parts
Quality Improvement
Development Support for National Projects Product Development

- 2023** Jul. CERT of a Management Innovation business Oriented SME (Main-Biz) by Ministry of SMEs and Startups
- Jun. CERT of a Technology Innovation-Oriented SME(Inno-Biz) by Ministry of SMEs and Startups
Designation CERT of Ppuri Technology Specialised Company by Korea National Ppuri Industry Center (KPIC)
- Jan. Commencement of Export to Europe
- 2022** Dev. Awarded a Commendation from the Minister of SMEs and Startups for Venture Enterprise
- Nov. CERT of ISO 45001 OHSMS
- Sep. Designation CERT of a Promising SME in Export by Ministry of SMEs and Startups
- May. Selected for the Smart Workshop Support Project
- Mar. CERT of SME Achievement-Sharing Enterprise
- Feb. Vendor Registration for SEMES / CERT of SEMES Supplier Quality(SSQ)

- 2021** Dec. Awarded a Commendation from the Minister of Ministry of Trade, Industry and Energy
Authentication of Merit for Export Frontier Enterprise by the Gyeonggi Provincial Government
- Mar. Commencement of Export of Semiconductor Precision Components to the United States
- Jan. Vendor Registration for SEMICS INC
- 2020** Nov. Semiconductor wafer chuck development and mass production
- Sept. TCB(Technology Credit Bureau) - Grade 3 by KODATA
Development and Production of Flow meter for Semiconductor Equipment
- Aug. Vendor Registration for CAS -SEMICONDUCTOR

- 2019** May. CERT of Qualified Maintenance Companies by 5 power generation public corporations under KEPCO
Vendor Registration for KSM Co., Ltd.
- Feb. Patent Registration for Size-Convertible Belt Magazine
CERT of Ppuri Enterprise by Korea National Ppuri Industry Center (KPIC)
- Jan. TCB(Technology Credit Bureau) - 4 grade by KODATA
- 2018** Nov. Signed a Medium-sized Enterprise Technology Cooperation Agreement with Gyeonggi Techno Park's Tech Doctor
- Oct. Selected for Support in Establishing Cooperative Smart Factories for Large, Medium, and Small Enterprises
- Aug. CERT of Specialized Material Component Company
- Jun. TCB(Technology Credit Bureau) - Grade 5 by KODATA

- 2017** Dec. HANBAEK PRICISION CORPORATION established
Vendor Registration for AP system co., Ltd.
- Nov. CLEAN Place Business Recognition
- Sept. Expansion and Relocation of the Self-Owned Business
- Apr. R&D Research Institute established
- Mar. CERT of ISO 9001 QMS & ISO 14001 EMS
CERT of Venture Business by Kibo Technology Fund

Capable Partner

HANBAEK

HANBAEK PRECISION CORPORATION: Your Growth Partner

We've forged key alliances worldwide for top-notch materials, parts, and equipments.
This fuels our streamlined production and boosts global competitiveness.

The Difference In
Fineness Is Innovation

Hanbaek's skilled engineering team, comprised of experts in precision component manufacturing, excels in handling tight tolerances and interpreting complex blueprints.

Leveraging superior precision machining techniques, we deliver top-notch components that not only meet but also exceed customer expectations.

We proactively address unforeseen issues in the production process with accuracy and speed, while also investing in continuous learning of new technologies and materials.

Hanbaek utilizes advanced 3D coordinate measuring machine and a range of precision measuring equipment to ensure accurate production of components and assembled modules, aligning precisely with customer specifications.

We've established a rigorous quality management and inspection system, making quality our top priority in operations.

Hanbaek delivers customized services tailored to meet customer needs.

Our advanced precision machining technology ensures accurate processing of even challenging materials, enhancing product performance.

Our optimization strategies address various customer demands, including cost-effectiveness and swift turnaround times.

Hanbaek excels in precision component manufacturing and modular assembly, offering top-tier expertise, unrivaled quality, and a commitment to ongoing innovation.

We highly value open communication and collaboration with our customers, contributing to their success.

This is how we maintain a sustainable and robust partnership, growing and thriving together.

Experienced Skill HANBAEK

HANBAEK's skilled ultra-precision machining technology

Precision micron machining, considering material traits
Producing precise components with $< 3\mu\text{m}$ Flatness Tolerances

Our core focus in precision component machining is achieving the highest level of accuracy and quality with minimal variation from specified dimensions. This precision is complemented by rigorous inspection using 3D coordinate measuring machine and systematic quality management, ensuring we supply our global customers with the best.

We manufacture semiconductor precision components using challenging materials like oxygen-free high conductivity copper (OFHC), alongside a variety such as aluminum (AL5052, AL6061, AL7075), stainless steel (SUS304, SUS316, SUS630), copper, tungsten, titanium, MONEL, PEEK, POM, PI, and more.

Key Product 1

HANBAEK

Semiconductor Wafer Vacuum Chuck

Hanbaek's semiconductor wafer vacuum chuck is a critical component of semiconductor manufacturing equipment, designed to securely hold wafers in place while ensuring their flatness and parallelism throughout various manufacturing processes. Our vacuum chucks maintain flatness tolerances of 3 μ m or less for oxygen-free high conductivity copper (OFHC), aluminum, and SUS materials. We can process wafers in sizes of 6 inches, 8 inches, and 12 inches. Additionally, we offer brazing options for 2 Floor, 3 Floor, and 4 Floor configurations to ensure compatibility with advanced processing technologies.

Size: 6", 8", 12"

Materials: AL6061, AL7075, SUS304, SUS316
OFHC(Oxygen free High Conductivity Copper)

Flatness Tolerance: 3 μ m or less

Brazing Options: 2floor, 3floor, 4floor

Surface Treatments: Anodizing, Electroless Nickel
Plating, Gold Plating,
Mirror Polishing

OFHC Copper Semiconductor Wafer Vacuum Chuck

OFHC copper material prolongs wafer chuck lifespan and minimizes the introduction of impurities into semiconductor materials, preventing potential contamination. Its low hardness allows for easy machining and shaping, enabling precise customization of chuck designs. However, it demands special care and precision for smooth surface finish due to challenges like warping, burrs, and deformation, as well as work hardening during machining.

Mirror Polishing

Nickel Plating

Anodizing

Key Product 2

HANBAEK

Semiconductor Flow Meter Precision Component

This is a precision component of a semiconductor flow meter used in semiconductor manufacturing processes. It accurately measures the flow of various gases and liquids used in semiconductor production, providing real-time data for rigorous process control. The modular product consists of a Body, Impeller, Tungsten Shaft, and Brazing Shaft. It can be processed from materials like aluminum, stainless steel (SUS304, SUS316), POM, and PEEK. We offer sizes of 1/2", 3/4", 1", and 1 1/4".

Modular Product

Size: 1/2", 3/4", 1", 1 1/4"

Materials: AL6061, SUS304, SUS316, POM, PEEK

Components: Body, Impeller, Tungsten Shaft, Brazing Shaft

Semiconductor Flow Meter

This is a semiconductor flow meter designed for high-precision flow detection and capable of withstanding temperature changes from low to high. It is engineered to maximize utility in confined spaces by minimizing components like sensors and converters, specifically designed for semiconductor equipment.

Key Product 3

HANBAEK

Semiconductor Precision Components

Hanbaek manufactures and supplies precision components and modular products for various machinery, including semiconductor production equipment, bio-tech, secondary batteries, aerospace, and robots. We offer tailored solutions, proposing ideas and designs to enhance functionality. With efficient integration of production, quality control, and inspection systems, along with strategic partnerships with domestic and international manufacturers of materials, parts, and equipment, we deliver products with speed, excellent quality, and competitive costs to ensure customer satisfaction.

Size: MCT 5-6.5", CNC 6-10", TURNMILL

Materials: AL5052, AL6061, AL7075, SUS304, SUS316, SUS630, Copper, Tungsten, Titanium, Monel, POM, PEEK

Features of Semiconductor Precision Components

Our precision components maintain strict tolerances, requiring advanced machining capabilities to achieve minimal deviation from specified dimensions. Additionally, our meticulous quality control throughout the machining process identifies and corrects specifications and variances, resulting in the production of high-quality precision components.

Applicable Industry

HANBAEK

Hanbaek collaborates with global partners from the early stages of projects to develop rational production processes. We offer competitive solutions to our customers, including shortened manufacturing times and cost-effective production. We export semiconductor precision components to various countries worldwide, including North America, the EU, and Asia.

Furthermore, through initial joint development with leading domestic companies, we produce and supply custom-designed products through ODM/OEM partnerships.
